

Co-sponsored by
KU's Center of Excellence in Chemical Methodologies and Library Development
and Center for Cancer Experimental Therapeutics COBRE

High Throughput Screening Symposium

Monday, March 12, 2007

10:00 am - 4:00 pm

Higuchi Biosciences Center, West Campus

The University of Kansas

Schedule of Events

10:00am

Opening Remarks (Simons Auditorium)

Jeffrey Aubé, Director, KU Center for Chemical Methodologies and Library Development
Barbara Timmermann, Director, KU Center for Cancer Experimental Therapeutics COBRE

10:15am

Dr. John S. Lazo

“Probing for Potential Protein Phosphatase Perturbants”

Director, Drug Discovery Institute, University of Pittsburgh
Allegheny Foundation Professor of Pharmacology, University of Pittsburgh School of Medicine

11:15am

Dr. Bryan L. Roth

“Designed Ligands or Evolved Receptors: How Best to Modulate Neuronal Activity?”

Director, NIMH Psychoactive Drug Screening Program
Professor, Dept. of Pharmacology & Div. of Medicinal Chemistry and Natural Products,
School of Pharmacy, University of North Carolina

12:15pm

Lunch (Smissman, Room 152)

For pre-registered attendees only

1:30pm

Dr. James Inglese

“Quantitative High Throughput Screening: Improving Decision Making in Lead Identification
by the Comprehensive Biological Activity Profiling of Chemical Libraries”

Director, Biomolecular Screening and Profiling Division, NIH Chemical Genomics Center
Associate Investigator, Genome Technology Branch, National Human Genome Research Institute

2:30-4:00pm

Poster Session (Structural Biology Center, Room 180)

All are invited to attend
